DETAILED ACTION

1. The Amendment and Petition for Time Extension filed by Applicant on 09/26/03 have been entered.

Response to Amendment/Arguments

2. Applicant's amendment and arguments filed on 09/26/03 have been fully considered and they are found persuasive.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

4. The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before

November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

5. Claims 30-44 remain rejected under 35 U.S.C. 102(e) as being anticipated by Giardello et al., U.S. Patent No. 6,409,875 (hereinafter "Giardello"). Giardello teaches metathesis-active adhesion agent compositions and methods for enhancing the adhesive strength and durability of adhesion of polymers produced by metathesis to substrate surfaces. See Giardello, col. 2, lines 47-50; col. 6, line 58 through col. 8, line 32. Giardello further teaches metathesis-active olefinic moieties including norbonenes and other cyclic olefins, which can comprise an array of compatibilizing functionalities. See Giardello, col. 3, lines 8-24; col. 3 line 61 through col. 4, line 35. Giardello teaches as a further aspect of the invention is an article of manufacture, such as a molded part, comprising a polyolefin adhered to a substrate surface using a metathesis-active adhesion agent of the invention. See Giardello, col. 3, lines 29-34; col. 5, lines 20-42. Giardello further teaches the use of one or more ROMP polyolefin compositions to "glue" one or more substrates of different type. See Giardello col. 8, line

54 through col. 9, line 4. Thus, Giardello anticipates claims 30-44.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

7. A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
